

RocketRibbon® Product Features

RocketRibbon Cable-250

RocketRibbon HD Cable-250

RocketRibbon XD Cable-250

RocketRibbon Indoor/Outdoor Rise/LSZH™ Cable

Fast termination with solid ribbons for seamless mass-fusion splicing

Fast termination with solid ribbons for seamless mass-fusion splicing

Fast termination with solid ribbons for seamless mass-fusion splicing

Fast termination with solid ribbons for seamless mass-fusion splicing

Easy Cable Identification with improved jacket marking for faster field reference

Easy Cable Identification with improved jacket marking for faster field reference

Easy Cable Identification with improved jacket marking for faster field reference

Fiber counts up to 6,912

Up to 28% Smaller cable diameter, accommodating up to 2x more fiber per duct

Up to 28% Smaller cable diameter, accommodating up to 2x more fiber per duct

Finger-Peelable subunits provide instant access to gel-free ribbon stacks

Finger-Peelable subunits provide instant access to gel-free ribbon stacks

Up to 50% Lighter creating less load-bearing tension on aerial installations

Up to 50% Lighter creating less load-bearing tension on aerial installations

Furcation-Free, route subunits/sleeve directly into hardware

Ease-of-use in an indoor/outdoor rated cable with its innovative Riser/Low Smoke Zero Halogen jacket

Up to 60% Faster cable access, enabled by our FastAccess® technology

Up to 60% Faster cable access, enabled by our FastAccess® technology

Fiber counts up to 3456, doubling the density of legacy ribbon cables

Available in 200 μm (6,912) or 250 μm (1,728/3,456) fiber designs

Reduced risk with FastAccess jacket, offering craft-friendly cable prep

Reduced risk with FastAccess jacket, offering craft-friendly cable prep

Available in 200 μm or 250 μm fiber designs

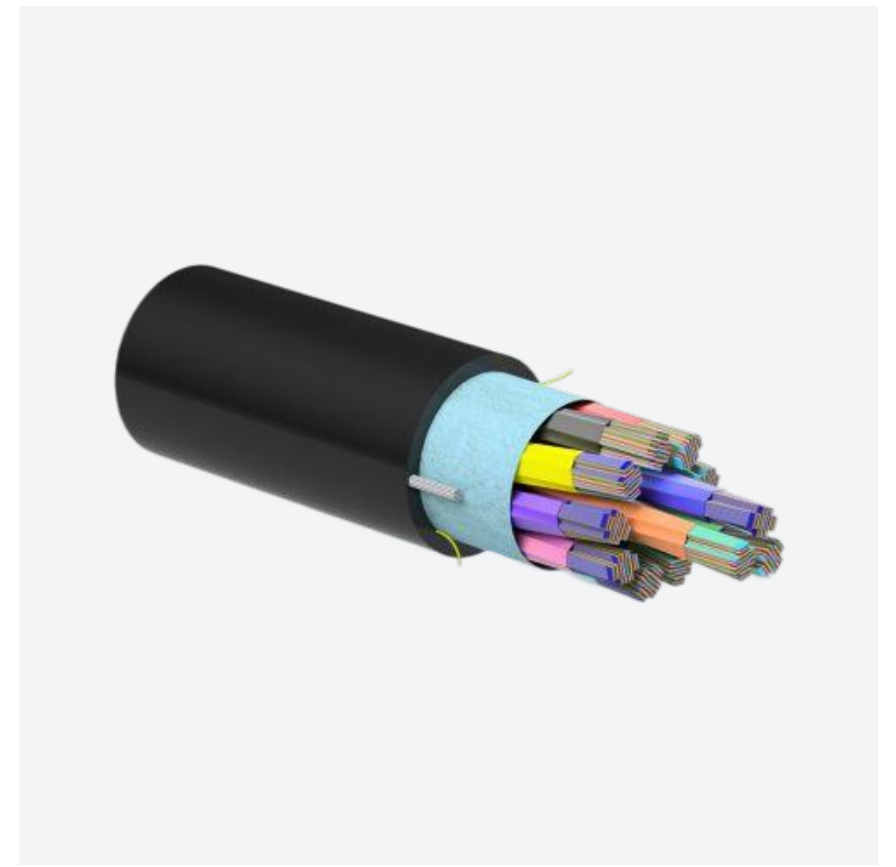

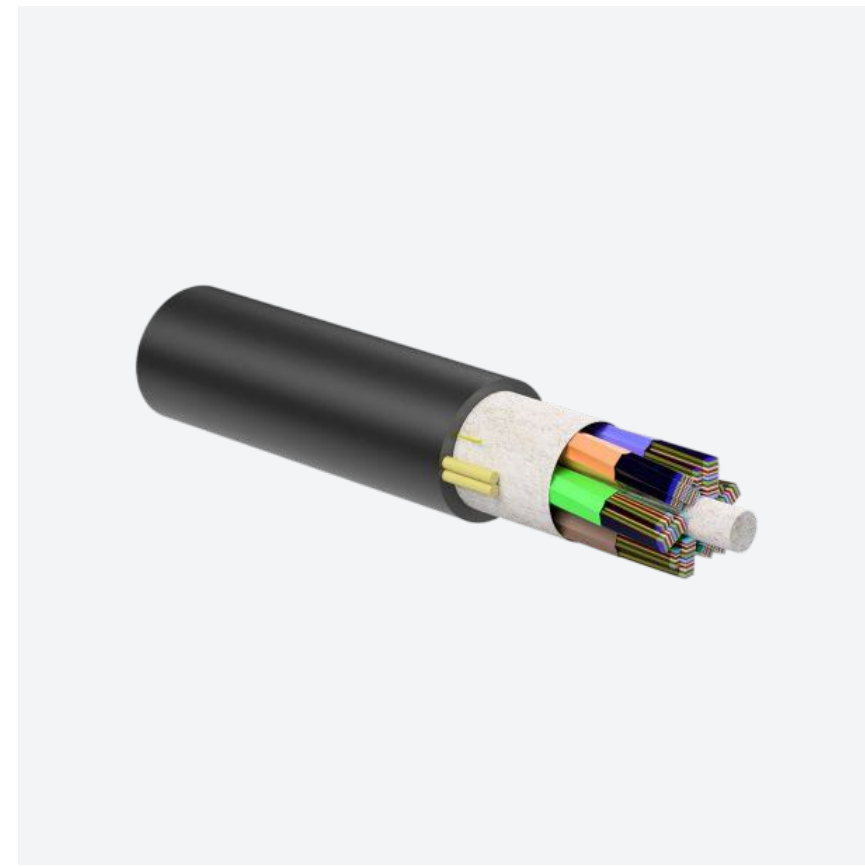

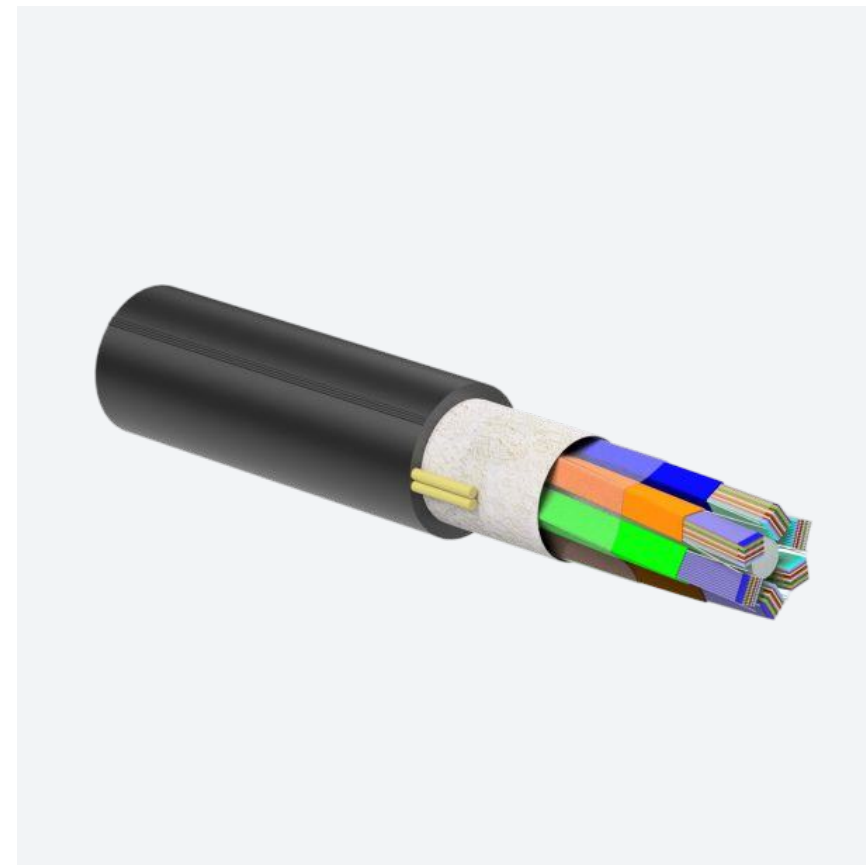

Uncompromised Attenuation with industry-leading fiber performance and full backward compatibility

Uncompromised Attenuation with industry-leading fiber performance and full backward compatibility

Furcation-Free foam sleeve, route sleeve directly into hardware

Furcation-Free finger-peelable subunits provide instant access to gel-free ribbon stacks, route subunits directly into hardware

RocketRibbon® Product Features

Cable-250
